

# **WATERTIGHT EXPANSION JOINT SYSTEMS**

MIGUTAN EVOLUTION

**MIGUTAN**

# **ALTERNATIVE INSTALLATION** FOR MIGUTAN PROFILES WITHOUT CONNECTION JOINT

## **Advantages:**

- Simplified installation process as additional application of connection joint is not necessary – time saving included
- Cost saving by omitting connection joint and AAP Profile
- Installation of the profile can take place chronologically independent of covering
- Movement joint is sealed and trafficable before application of covering
- Easy to maintain

## **Technical data:**

Technical data for MIGUTAN expansion joints with short sheets are valid with respect to loads and absorption of movement.

MIGUA 360° SERVICE

MIGUA is Europe's leading expert in the construction, manufacture and installation of expansion joint systems.

MIGUA expansion joint systems are used to cover, close and seal expansion joints. Our products satisfy even the most rigorous standards in quality and safety, making them ideally suitable for large-scale construction projects such as airports, train stations, industrial plants, car parks, shopping centres, exhibition halls and hospitals. Our engineers are committed to developing genuine MIGUA solutions based on experience, technology and innovation.
